Appn. Number: 09/866,454
Filed: 05/25/2001
Applicant: Rice, James L.
Title: System and method of permissive data flow and application transfer
5 Examiner: Thong H. Vu

Minneapolis, 12 February, 2005

Amendment B

10

Sir:

In response to the Office Action mailed 08/13/2004, please amend the above application as follows:

15

Title: Change to: Remote File And Application Access Via Hyperlink

Specification:

20

Please cancel the current specifications and accept the enclosed substitute specifications.

Changes: The primary change has been deletion of matter unrelated to the Applicant's claims to make the application easier to read and follow. One table in the specification text has been moved to the drawing figures. A few references to Figures were added.

25

Former figure 6 has been renumbered as Figure 1, since it reflects the primary invention. The references to the renumbered figures (see next paragraph) have been updated. A paragraph from the body of the specifications has been added to the invention summary as a better description of the claimed invention. A marked-up copy showing deletions and additions is included as well as a clean version. **No new matter** has been added to the substitute specifications.

30

Figures:

35

Applicant requests to cancel several drawing figures which are not relevant to Applicant's claims, in order to make the specifications simpler, more relevant, and easier to read. Specifically, Figures 1, 4B, 18, 28, 30, 31, 32, 33, 34, 36, 37, 38, 49 are canceled. The remaining figures have been renumbered and submitted as corrected drawings. Additionally, former Figure 6 has been reordered as Figure 1, since it is representative of the invention as now claimed. It is recommended that Figure 1 be used on the title page if a patent is granted. **No new matter** has been added to the figures.

40

Claims:

Cancel all claims of record and substitute claims 132-200. Previously canceled were claims 1-60, so in summary claims 1-131 are canceled, and claims 132-200 are new and pending.
